Associate Supervisor

Canadian Tire

2016 – 2018

Toronto, Canada

PROJECTS

Pets N' Pals [↗](#)

Engineered a robust Next.js application utilizing Express and Redux Toolkit, aimed at empowering users to effortlessly discover a wealth of pet-related insights. Seamlessly integrated front-end and back-end technologies to offer a streamlined experience.

- Implemented account creation, pet registration process, ecom capabilities and more.
- Used conditionals to fetch personalized articles and products based on the registered pet's breed.

Product Manager Clone [↗](#)

I designed and implemented a product manager application using Ionic Angular, Supabase database and more. This app enables users to easily access information on existing products by SKU, assign products to bunk locations, and perform other essential tasks related to product management.

- Built an Ionic Angular application using HTML, CSS and TypeScript.
- Implemented features like product inquiry, assign location functionality, and user authentication.

SKILLS

- Data Structures and Algorithms
- Mobile Application Development
- Full Stack Development
- Troubleshooting
- Object-Oriented Programming
- Operating Systems
- Responsive Web Development
